The system for creating event, searching for other event events and buying tickets

2) Audience:

The audience for this document can be the event creator, event attendees, the members of this event and the users who interested in the idea or the topic of the event.

B) Introduction:

Scope:

This project talks about the event organizer, first of all event organizers are responsible for the production of events from conception through to completion.

The role of event organizer varies depending on the organization and type of event involved. Activities often include:

- Researching markets to identify opportunities for events.***
- Producing detailed proposals for events (timelines, venues, suppliers, legal obligations, staffing and budgets).***
- Agreeing to and managing a budget.***
- Securing and booking a suitable venue or location.***
- Identifying and securing speakers or special guests.***
- Coordinating staffing requirements and staff briefings.***
- Liaising with clients and designers to create a brand for the event and organizing the production of tickets, posters, catalogues and sales brochures.***
- Coordinating suppliers, handling client queries and troubleshooting on the day of the event to ensure that all runs smoothly.***
- Post-event evaluation (including data entry and analysis and producing reports for event stakeholders).***

The objective of this project is to collect people for solving problems or maybe for telling them anything important, this event easier to connect them together and also reunion sales, marketing and advertisings.
